> **Type D210A**
without vacuum ring

> **Type D211A**
with internal vacuum ring

Cross section D210A

Universal expansion joint with one arch

Design: Streamlined, single arch rubber bellows with self-sealing rubber bulges, designed to compensate all directional movements, have a cycle life in the tens of millions, constructed with a high-grade leak-proof tube, multiple layers of high-strength cord, a seamless cover, and swivel backing flanges with threaded holes. Optional with vacuum ring. In compliance with PED 2014/68/EU, FSA Technical Handbook and ASTM F1123 - 87.

Diameters: ∅ 32 to 500 mm

Length: $L_E = 100$ or 110 mm (> page 162–163)

Pressure: Up to 25 bar depending on diameter
Vacuum stability on request, with vacuum ring up to 0.05 bar absolute

Movement: For large axial, lateral and angular movements

Application:
Cooling water systems,
desalination plants,
drinking water supply,
plant construction, e. g.
in pipelines, on pumps,
as dismantling joints, on
condensers and vessels
